### Maintenance Option / Upgrades

Users who require continuous up-to-date editions of any global data product can select the Maintenance Option to receive updates for one year (renewable) for 50% of the current list price (including multi-user multiplier). Currently this option is only available at time of initial purchase and is renewable annually. Updates are normally supplied quarterly. A regular one-off upgrade, for any product, can be made at 30% of current list price.

### Multi-User Licensing

Multi-user licence fees can be calculated by using the following multipliers of the single user fee.

Users	Multiplier
2	x1.5
5	x2.0
10	x2.5
15	x3.0
25	x4.0
50	x5.0
100	x6.0
250	x8.0
500	x10.0
Site/Corporate	POA

### Web & Server Licensing

Digital map data products may be deployed in an Internet / Intranet web environment or used in a server based capacity. There are two type of licence – both of which are based on a per-year, per-application basis, but with unlimited servers and traffic. The standard web licence allows for map images or derived information to be delivered to end-users over the web. The resale web licence allows the use of a product in a service capacity where maps are being rendered on behalf of a third party. For Intranet or server based applications where the number of users is limited, the multi-user licence pricing above (one payment, perpetual licence) can be used. Web and server licensing includes all data updates for each licensed year.

Web/Server Licence	Multiplier
Standard	x3.0 per year
Resale	x5.0 per year

## Miscellaneous

**All products include free shipping:** FedEx Priority Service Worldwide / Royal Mail Special Delivery within U.K.

All products include lifetime technical support from Europa Technologies, in addition to any support offered by an authorised reseller.

All prices are exclusive of local taxes / UK Value Added Tax (VAT), if applicable. Customer within the European Union must provide their VAT (sales tax) reference number in order to avoid paying UK VAT.

Note that all Europa Technologies data products are licensed, not sold, and are subject to a standard licence agreement. <http://www.europa.uk.com/eula.php>
